Skills

Software developer since 2018.

I'm working with: Node.js, Python, and recently with Go.

For the web, I am comfortable with most popular libraries and frameworks. I mostly use React and Svelte.

Experience

8x8 / Senior Software Engineer

March 2023 - PRESENT, Remote

Moving from Monolithic Architecture to Microservices.

Building Desktop apps in Node.js for Windows and Mac.

Creating and developing Micro Frontends with React.

Globant / Software Developer

May 2022 - March 2023, Remote

Creating and developing native apps on Android and iOS for various clients with React Native and Node.js.

Creating and developing a streaming platform for sport content.

Vivajo / Software Developer

April 2021 - May 2022, Sibiu, Romania

Developing and maintaining multiple web apps owned by the company. I contributed with Vue, Node.js and Python.

Freelance / Software Developer

October 2019 - Mar 2021, Pforzheim, Germany

Creating and developing a platform for virtual tours management, written in Node.js for a German company.

Creating a shops system that lets you manage multiple online shops from an admin dashboard, written with React and Django.

Wise Systems / Software Developer

March 2019 - October 2019, Bucharest, Romania

Developing and maintaining multiple web apps with Angular, Vue and Node.js.

Education

Management, Academy of economic studies

October 2016 - June 2019, Bucharest

I studied economics and management.

About me

In my spare time I enjoy coding or trying new technologies.

I do sports activities like tennis, going for a run and tennis.

Another hobby is disassembling my car from time to time.
